

The Biomedical Research Unit at the Institut de Recerca Vall d'Hebron

We are seeking for highly motivated and enthusiastic candidates to apply for a 4 year fellowship to realize a **PhD. thesis** (“Ayudas predoctorales de formación en investigación en salud (PFIS)” del Fondo de Investigación Sanitaria (FIS)) in April 2010 in **Prostate Cancer Research and Translational Oncology**.

Our research is focused on the molecular, translational and clinical aspects of prostate cancer. All projects are based on clinical needs and unresolved clinical problems. The final aim is to develop new and valuable clinical tools to improve diagnosis and prognosis, helping with predictive medicine and therapy. This PhD. project deals with the development of non-invasive methods for the early detection of Prostate Cancer in biological fluids

Profile:

- Very good score at college (academic espedient 2.5 or higher) is required to qualify for Spanish or international fellowships
- Previous laboratory experience would be a plus
- English written and spoken (intermediate level)
- To apply for the PFIS fellowship the candidate must have obtained his degree after 1 January 2007.

Type of contract and salary:

Duration: 48 months (first two years scholarship from the 3rd year contract).

Salary: 1.300€ per month, including the amount of the scholarship and the cost for and the Social Security.

Contract Period: 27,000.00€ per year, corresponding to 14 monthly, including salary and costs for and employer's Social Security.
